

# MANY SOLUTIONS ONE SUPPLIER

We are the only one company in Europe, which has five different departments producing industrial packaging. Therefore we are able to design, develop and deliver the complex product with a full control of each production processes.

## FOAM PROFILES

Our offer includes several different kinds of foam. Using modern production technologies we manufacture foam products for a wide variety of industries.

We are able to produce foams dedicated for different shapes of the parts using CNC milling and cutting devices.

### PRODUCT PHILOSOPHY

### ONE YEAR IN IGOPAK

> 1 000 000 protected products

> 200 customers

> 200 000 packagings

> 5 000 000 m<sup>2</sup> raw materials

## PLASTIC CONTAINERS WITH INSERTS

We supply our customers with two kinds of plastic containers:

- Manufactured using an injection molding method. They are highly durable and have dimensional stability.
- Made of corrugated polypropylene boards. These containers are custom made in a variety of sizes.
- There is possibility to produce them in ESD version.

## STEEL CONTAINERS

- We offer a wide range of steel containers for transport and storage, from standard construction to projects for individual clients' requirements. Our containers equipped with textile or foam inserts are the perfect solution for the most demanding customers.

## TEXTILE SOLUTIONS

- Our textile packaging solutions are reusable and highly protective inserts for plastic and steel containers.
- We prepare complex projects from the external constructions to the inserts.

➤ **PRODUCTS**  
We design and manufacture reusable packaging for the automotive industry.

➤ **BUSINESS**  
We protect our customers products by limiting losses and creating savings - thereby increasing their profits.

➤ **ENVIRONMENT**  
We measure and minimize the impact of our business on the environment.

## TRIPAK BULK CONTAINERS

➤ These bulk containers, available in both collapsible and stationary constructions, have many potential applications due to the wide range of possible inserts:

- Textile
- Foam
- Corrugated PP separators
- Thermoformed moldings
- Aluminium-/Steel frames
- Plastic moldings

## ROBUST & LIGHTWEIGHT

- max. payload 1000kg
- Net weight - from 12kg

- Ideal alternative to steel containers, pallet cages or wooden containers.
